

PebblePath

Your family's AI companion — always one step ahead.

The calm behind a busy family.

Family life runs on a thousand small decisions — schedules, school emails, packing lists, pickups. **PebblePath is the AI that carries the load** — quietly noticing what matters and preparing the next step before you have to ask.

WHAT YOU GET

Meet Pebble, your AI companion

Pebble learns your family's routines and rhythms, then turns them into a calm daily brief — proactive reminders, prep lists and ready-to-use plans.

A living memory for your family

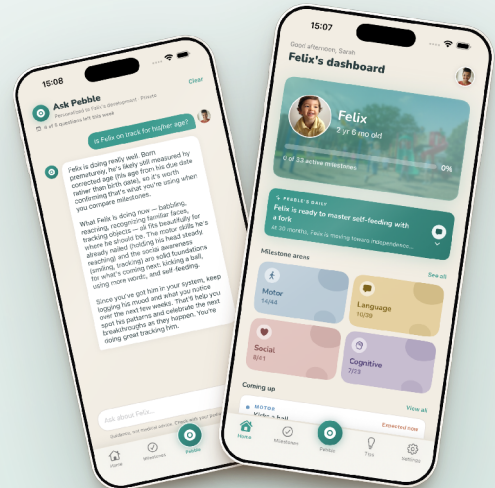

Allergies, sizes, routines, daycare details, preferences — PebblePath remembers the small things so no one has to, and both parents stay in sync.

The operational load, lifted

Packing lists, pediatrician summaries, calendar coordination, parent handoffs — the invisible work behind family life, quietly handled for you.
